INNOVATIVE PROJECT 2019

BIRDS NEST

Birds will have to work less to build a nest at Sri Raja Raajan College of Engineering and Technology, Amaravathipudur. Their jobs have been rendered easier by the hanging of earthen pots hollowed at a side, in which they can lay eggs, on trees. Many birds cannot peck and make holes in the trees. If they get a ready-made place where to make a nest, it will help them. We made earthen pots as it is low cost and they would not be repelled by the smell of earth.

FISHERY REPORT

The report is all about our college pond ecosystem in the campus. This pond consist of various species of fishes. When the rearing season of fishes got increased, the fish farming is started .The fishes were used for cooking purpose in hostel. And remaining fishes were sold to the staff members who require it. Hence this pond ecosystem is totally useful for the college.

INNOVATIVE PROJECT 2019

FISH POND

The fish to survive grow and reproduced, fish need to feed on organic materials such as plants, other animals or prepared feeds containing plant or animal materials there are three types of food used in fish ponds.

- 1) Natural food
- 2) supplementary feeds
- 3) complete feeds

Natural food is found in naturally in the pond. It may include detritus, bacteria, plankton, worms, insects, snails, aquatic plants and fish. It is good supply of natural food to our fish. Supplementary feeds do not have to provide a complete, balanced diet alone. They add extra nutrients for fishes. They are rice, vegetable waste, popped rice, rusk waste. Pelleted feeds can be used either as a supplementary diets in fish pond or as Complete diets in intensive culture systems.

HERBAL GARDEN

This report gives detail about the Herbal Garden in our college. In our herbal garden having nearly 50 types of medicinal plants. It involves the medicinal use of plants to treat diseases and enhance general health and wellbeing. Some herbs have powerful ingredients and should be taken with the same level of caution as pharmaceutical medications. Consuming herbs may help to prevent and manage heart disease, cancer and diabetes. Some herbs reduce the blood clots and provide anti-inflammatory and anti-tumour properties. That herbs are used by our college students as well as staff members.

INNOVATIVE PROJECT

HERBAL GARDEN 2018

An herbal garden is often a dedicated space in a garden, devoted to growing a specific group of plants called herbs or medicinal plants. Medicinal plants and herbs are considered valuable and important ingredients which can be used in development of life saving drugs. Apart from that, these plants also play critical role in the health, well being and human culture of people around the world.

MUSHROOM REPORT

This report gives about production of mushroom cultivation. At our campus, Mushroom project aims to establish sustainable and profitable venture that produces high quality of mushrooms. It reduces risk of cancer, promote lower cholesterol, protect brain health, provide a source vitamin D and support the healthy immune system. Mushrooms were used for cooking purpose in our hostel. The remaining mushrooms were sold to the staff members who required it and also sold in the market.

INNOVATIVE PROJECT 2022

MUSHROOM CULTIVATION

Mushroom cultivation is a technology of growing mushrooms using plant, animal and industrial waste. In short it is wealth out of waste technology. This technology has gained importance of worldwide because of its dietary fibres and protein value. Mushroom is a fungi belonging to Basidiomycetes. Rich in minerals, proteins, fibres and vitamins. In our college we are going to cultivate Oyster Mushroom. (*Pleurotus* spp.) 20 students are involving in this project.

INNOVATIVE PROJECT 2021

VERMICOMPOST

Vermicompost is the product of decomposition process using various species of worms, usually red wigglers, white worms and other earthworms, to create a mixture of raw materials, vegetables or food waste, bedding material, and vermicast. In our college, we are doing vermicompost project with our student.
